**INTER-DEPARTMENTAL MEMO**

TO: Mike Ball  
DATE: March 5, 2007  
SUBJECT: CommVault Galaxy Backup Software

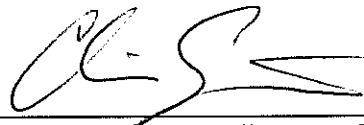

The Department of Information Resources (DIR) is an agency of the State of Texas that has established contracts with vendors for technology related products and services. DIR contracts have been competitively bid and meet the competitive bid requirements stipulated in Texas Government Code, Section 791.025. As a public school district we are eligible to purchase from DIR contracted vendors and receive the discounts that are based on the state's anticipated volume for participating state agencies, public institutions of higher education, public school districts and other local governments.

Dell Marketing is a participating vendor of DIR and has submitted the attached quote for CommVault Galaxy software which the Technology Department is requesting to purchase per the attached memo from Chris Speier, Coordinator of Technology.

It is the recommendation of Mark Pantel, Director of Purchasing and Chris Speier, Coordinator of Technology that we purchase the CommVault Galaxy backup software from Dell for \$34,892.32.

Mark Pantel, Director of Purchasing

Chris Speier, Coordinator of Technology
