
INTEROFFICE MEMORANDUM

TO: MARK PANTEL
FROM: CHRIS SPEIER 
SUBJECT: CHIEF PLENUM ENCLOSURES
DATE: 10/8/2007
CC: CLARK EALY

As part of the May 2007 Bond package, funds were set aside for the installation of projectors in all suitable instructional rooms across CSISD. A key portion of this project is the installation of electrical outlets in properly rated enclosures. In an effort to standardize our installations for both maximum flexibility and ease of use, the Technology Department recommends the continued use of the plenum rated enclosures manufactured by Chief Manufacturing. We have had great success with this enclosure. It provides us a location to properly mount electrical as well as provide room to house other above ceiling components of the AV installation. The Technology Department recommends the purchase of the Chief enclosures from MicroAge via the Texas A&M AV contract M500441 in the amount of \$27,272.00.
